merging waves and channels since 2001

2k16/A

FLOP BEAT DISK / blocks&bits in rough mono

newest flops:

memero - plane geometry secrets

finally, after a long struggle, several changes of plans and half-a-year delay, this flop-cmo split comes out as a 12inch ep with one side full of chaotic gameboy low bit breakcore amok and the other containing two odd rhythmic pattern schemed remix drafts. strictly limited to 100 copies.

tlic - cyperkid reworx

another identity of the jean bach multi-personal-collective. pure sound aesthetics, several loops and recordings are carefully placed into not less than 9 tracks. 2,45 ground breaking dance-floor killers (if not more) included, plus a very rare audio report done on a field recording trip to one of the last remaining indigenous tribes. of timeless beauty.

transparent 7inch. lim100.

next:

flop0zfe. 12inch, lim.150.

about:

www.memero.org

harsh and powerful sounds mixed with fast complex and irregular drum flavoured noises. no samples or external inputs: all sounds are made by modelling raw waves generated by the gameboy sound chip.

memero - spaety. 7inch, 2015.

re-release of the original ultra limited killbot wax. two cool gameboy breakcore tracks full of hectic beat patterns and all these nice familiar sounds that accompanied your childhood. low bit overkill!

forgotten pearls and audio trash; finds 2016/A:

Klima & Morbus M - Past And Future
kellermusik10. 12inch, 2008.

Leipzig based label, active 2001-2008. released great minimal techno in its early years, and some industrialish melodic idm/dance electronix later. closed activity shortly after the release of that final wax, that never really was spread then. take the chance to get your copy!

End.user & CxFx - Infant Farming
mr023. 7inch, 2014.

digital grindcore & punk-breaks released two years ago. not many copies around so far, so minor helps to spread this fine little, almost forgotten pearl of audio aggressiveness. some in stock!
